# **Abdulrahman Ahmed**

## **Front-End Developer**

+201207583096 | Beni-Seuf, Egypt

<u>abdulrahman.ahmed2623@gmail.com|https://www.linkedin.com/in/abdo-ahmed-67185a28a|https://github.com/abdoahmed26</u>

## **OBJECTIVE**

Seeking a position as a Front-End Developer in a reputable company where my skills, educational background and experience can be fully utilized and enhanced.

#### **EXPERIENCE**

- Front-End Developer as a Freelancer for one year and still working

## **TECHNICAL SKILLS**

- React JS Redux Toolkit
- JavaScript

- TypeScript
- Tailwind CSS
- MongoDB
- Next JS
- HTML 5/ CSS 3
- Material UI
- Bootstrap
- Prisma
- Git GitHub

#### **PROJECTS**

## 1) My Portfolio (GitHub: profile | Live Demo: profile)

**Description :** My personal website contains all my information, projects, and means of communication, and shows most of my capabilities.

## 2) Chat App (GitHub: chat-app | Live Demo: chat-app)

**Description**: Developed a real-time chat application using [React.js, Node.js, Express.js, Socket.io, MongoDB, and Tailwind CSS]. The app allows users to register, log in, and engage in private chats. Messages are stored in MongoDB, ensuring persistence, while Socket.io enables real-time communication. The application also features user authentication, message notifications, and a responsive UI.

# 3) Library Store ( GitHub: <u>Library</u> | Live Demo: <u>Library</u>)

**Description**: full-stack library app using React.js, Stripe, Tailwind CSS, Node.js, and MongoDB. The app includes user registration, Google login, book catalog display, and cart functionality. Users can make payments via Stripe, rate and review books, and admins can manage the book inventory (add, edit, delete books).

# 4) E-commerce ( GitHub: E-commerce | Live Demo: E-commerce )

**Description:** full-stack e-commerce platform using Next.js, Prisma, MongoDB, Stripe, EmailJS, and Tailwind CSS. The app features user registration and login (with Google or GitHub), product display from a JSON server, and a cart system with product data stored in MongoDB. Users can make payments via Stripe and receive an order confirmation email through EmailJS. The admin can manage products (add, modify, delete)

### **EDUCATION**

Higher Education - Study at the Faculty of Computing and Artificial Intelligence starting from 2021 at Beni-Seuf University
